---

## Summary

Entry-level Software Engineer with proven experience delivering 8+ responsive client websites for UK / US clients, boosting e-Commerce SEO to increase traffic by 40%. Skilled in HTML5, CSS3, Java, Python, WordPress, Wix Studio, and cloud platforms (AWS EC2, S3, IAM; Azure Fundamentals), with hands-on exposure to accessibility optimizations. Skilled collaborator within international Agile teams to launch SEO-optimized, high-performance web applications that prioritize user experience and accessibility

## Work Experience

### Web Development Intern, Young Web Solutions (Paid Internship, UK & US Clients)

- Developed 8+ client websites using Wix Studio and WordPress for UK/US-based clients, focusing on responsive design and custom feature implementation.
- Managed bulk product uploads for e-commerce, increasing upload efficiency by 40%.
- Integrated homepage sections and CMS for service-based businesses using Elementor and Divi.

### Cloud Intern, Codezone IT Solutions Pune, India

- Explored AWS services including EC2, IAM, and S3 through guided deployments
- Built basic EC2 setups for demo apps; assisted in applying IAM policies.
- Learned monitoring/cost optimisation practices using CloudWatch and pricing calculators.

### Data Science & Machine Learning Intern, YBI Foundation Pune, India

- Performed data preprocessing and analysis using Python and Pandas to identify patterns and trends.
- Built basic machine learning models and created data visualizations with Matplotlib and Seaborn.

## Education

### B.E. in Computer Engineering

Keystone School of Engineering, Savitribai Phule Pune University (SPPU) Pune, India

*Expected Graduation: June 2026*

Relevant Coursework: Computer Networks, Database Management Systems, Software Development, AWS, Salesforce

## Skills

**Languages:** HTML5, CSS3, JavaScript, Python, Java, SQL, C++

**Frameworks & Tools:** React.js, Next.js, Tailwind CSS, WordPress, Wix Studio, Git, GitHub, Gradle

**Technologies & Concepts:** API Integration, Authentication, Agile Development, Git Workflow

**Cloud Platforms:** AWS, Azure, Netlify, Vercel, Salesforce

**Language Certifications:** JLPT N5

## Projects

### TourHouse – Travel Booking Website (Next.js + Tailwind CSS)

- Built a visually appealing, responsive travel website using Next.js and Tailwind CSS with a focus on clean UI and immersive user experience.
- Emphasized mobile-first design, smooth transitions, and visual consistency for a high-end "vibe-coded" aesthetic.
- Structured the project using modular folders, making the codebase scalable and easy to maintain or expand.
- Hosted on Netlify.

### EZ-Train Booking System (Java)

- Developed a backend application for train ticket booking using Java and file-based data persistence.
- Implemented user login system with role-based dashboards for customers and admins.
- Used Gradle for dependency management and integrated JSON parsing for data handling.
- Focused on backend modularity, validation logic, and ticket inventory control.

## Freelance Projects

### Client Websites with API Integrations

- Delivered 2 responsive client websites for therapy and wellness professionals using Divi/Wix.
- Integrated Calendly for appointment scheduling and Stripe for secure payment handling.
- Connected dynamic forms to client email workflows and implemented accessibility best practices.
- Deployed with performance optimization and SEO-friendly configurations.
