

Kaushal Sonawane

Software Engineer / Cloud & DevOps

sonawanekaushal05@gmail.com | +91 8767515720 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Software Engineer with hands on experience building web applications, backend services, and cloud-based solutions. Strong foundation in Data Structures, Algorithms, Object Oriented Programming, Database Systems, and Software Engineering principles. Experienced in developing scalable applications using Java, Python, JavaScript, SQL, and REST APIs while leveraging AWS, Docker, and CI/CD practices for deployment and automation.

Work Experience

DevOps Engineer, ThynkTech India

Sept 2025 – Mar 2026

- Built CI/CD pipelines using Jenkins and GitHub for automated application deployments.
- Containerized applications with Docker, managed Kubernetes deployments, and maintained AWS infrastructure.
- Monitored workloads using CloudWatch, administered Linux servers, and resolved system issues to improve reliability.

Web Development Intern, Young Web Solutions

Feb 2025 – July 2025

- Developed 8+ client mobile responsive websites for UK/US-based clients.
- Collaborated with clients to implement new features, resolve issues, and improve user experience
- Managed deployment workflows, version control, and website maintenance across production environments.

Cloud Intern, Codezone IT Solutions

Sept 2024 – Dec 2024

- Worked with Auto Load Balancing, IAM roles, S3 storage, and VPC networking.
- Built and tested 2-tier and 3-tier architectures for practice deployments.
- Monitored instances using CloudWatch metrics and logs for performance spikes.

Education

B.E. in Computer Engineering

Keystone School of Engineering, Savitribai Phule Pune University (SPPU)

Pune, India

Graduation: July 2026

Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Cloud Computing

Skills

Programming: Java, Python, JavaScript, SQL, C, C++

Web Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Node.js, REST APIs

Databases: MySQL, Oracle Database, PostgreSQL

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Ansible, Linux

Tools: Git, GitHub, Postman, Figma, ChatGPT, Claude AI, GitHub Copilot

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, Software Engineering, Database Design

Certifications

- [Oracle Certified Architect Associate](#)
- [Oracle Certified Agentic AI Associate](#)
- [Salesforce Certified Agentforce Specialist](#)
- [Japanese Language Proficiency Test \(JLPT N4\)](#)

Projects

MediTrack – Infrastructure Automation with Ansible

- Developed a healthcare application for managing patient records, appointments, and medical history.
- Integrated AI-based health recommendations using patient data and predefined health parameters.
- Implemented secure authentication and role-based access control for patients and healthcare providers.
- Automated deployment and server configuration using Ansible and cloud infrastructure.

Sanz Cafe – Freelance Project

- Developed and deployed a responsive website for a business client.
- Optimized user experience across mobile and desktop devices.
- Collaborated directly with the client to gather requirements and deliver requested features.

RelationOS – Cross-Platform Mobile Application

- Developed a full-stack, cross-platform mobile application using React Native, Expo, TypeScript, and Tailwind CSS.
- Built a file-based routing architecture featuring secure authentication, multi-tier onboarding, and paired user states.
- Optimized state management and component structures to streamline data rendering and maximize mobile performance.
